

Customer Advisory

Update on Baltimore #8

May 2, 2024

Dear customer,

As crews and authorities focus on operations to remove the DALI, the fourth temporary channel with a controlling depth of 30 feet is closed. For the time being, we continue to operate limited barge services through the temporary channel that has a controlling depth of 20 feet; we are contacting customers directly should we be able to offer a barge service.

There is currently no definitive timetable for when the fourth temporary channel will re-open or when the Port of Baltimore will fully re-open. When we can confidently re-open booking services into and out of Baltimore, we will alert you.

We understand your need for clarity on your cargo, as well as future changes to our routes regarding Baltimore. We are working diligently to identify solutions and will inform you as soon as possible of changes to current and future cargo to Baltimore.

If you have any questions or need further information on your cargo, please reach out to your local Maersk representative. Our teams are on hand to support with your planning, should you need any assistance.

Yours sincerely,

A.P. Moller-Maersk
