

THE Alliance Announces Transpacific-East Coast Change

Dear Valued HMM Customer,

In light of challenges stemming from water scarcity at the Panama Canal, HMM is actively addressing a reduction in daily canal transit allowances. Moreover, the situation in the Middle East has heightened with vessels attacked in the Red Sea over the past few days. Given the intricate nature of the current circumstances, HMM faces the decision of implementing a waiting period of undetermined duration or exploring alternative routes with additional costs.

In response, HMM has chosen to reroute several upcoming voyages through the Cape of Good Hope. Please refer to the schedule updates below for our East Coast Loop EC1, EC2, EC4 and EC6, which include vessel names, voyages, and estimated time of departure (ETD):
